

## Chassis Suitability for Duplex –Zer0 Bin Washers

Chassis Suitability for Duplex –Zer0 Bin Washers.

If you are considering the use of any chassis that is not specified above then you should first check the specification with Green Clean to ascertain its suitability or any additional fitting costs that may be incurred.

Below is a list of dimensions that need to be taken into consideration when looking for a suitable enclosed van in which to mount the Duplex –Zer0 Bin Washer.

1. Load space length minimum 270cm
3. Load space width minimum 156cm
4. Load space height minimum 190cm
5. Payload minimum 1000Kg
6. If a tow bar is fitted this may have to be removed. This depends on how far it projects from the rear of the vehicle.

If buying from new, we recommend asking the manufacturer to treat the load space so that it is water tight. Those in cold countries may also wish to consider having a heating system fitted by the manufacturer.

It is the responsibility of the franchisee to ensure the chassis is supplied to Green Clean in a roadworthy condition with all chassis parts and lights intact and painted white in colour. If you require any further information or clarification as to the suitability or cost of fitting the Green Clean range, then please do not hesitate to contact us.
