- Energy consumption 13.2 kW

Why Choose Us

The Green Cleen electric Static Bin Wash is designed for installation at hospitals, airports, shopping centres and other commercial facilities. It was the first electric static bin cleaning equipment on the market, offering operators a permanently situated bin cleaning solution.

High quality build

8 weeks build time

Installation

The Static Bin Wash requires a hosepipe water feed, 3-phase electric connection, a close drain for water discharge and a suitable flat surface of approx 3 m x 4 m. The Static Bin Wash offers easy plug-and-play installation. No specialist equipment or engineers are required. Green Cleen provide full operator training on the use and maintenance of the equipment.

When shipping our bin cleaning equipment outside the UK, we can arrange door-to-door delivery via a haulage company. The bin cleaning equipment can come shrink-wrapped on a pallet or we can provide bespoke wooden crates at the customer's cost.

Dimensions for delivery are below and include the pallets.

- Length 200 cm
- Width 170 cm
- Height 215 cm
- Pallet 1.50 mm
- Weight is just under 1 tonne

Description

The Green Cleen electric Static Bin Wash offers a floor-mounted semi-automatic bin cleaning process designed to clean commercial two and four-wheeled bins in one location. These bin-cleaning machines allow the operator to achieve a high productivity rate with minimal physical effort whilst ensuring compliance with the environmental agencies and local water authority regulations.
