- Water pump 30 L/pm 140 BAR/2320psi
- Multi-stage filtration to 300 microns
- High-pressure hand lance
- Optima Gel Battery
- 12V electro-hydraulic system
- Shot blast and powder-coated metalwork

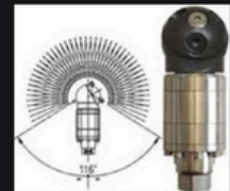

Chassis Suitability

The **Duplex** Bin Washer can be installed on most 2x4 or 4x4 single-cab pickup trucks. You should first check with Green Clean to ascertain the suitability and any additional fitting costs that may be incurred.

1. Loadspace length minimum 2100 mm
2. Loadspace width between wheel arches, minimum of 1000 mm
3. The width between flanges of the tailgate is a minimum of 1350 mm
4. Load bed height from the ground, maximum 800 mm
5. Payload minimum 950Kg
6. Some vehicles can use load liners. Please check first with Green Clean. Line-X protective paint is available.
7. If a tow bar is fitted, this may have to be removed. This depends on how far it projects from the rear.
8. The tailgate **MUST** be removed before bringing the vehicle to Green Clean for machine fitting.

Description

Equipped with a petrol engine, a high-pressure water pump, two fixed orbital wash heads and a hand lance for exterior washing. The system reclaims and recycles the wastewater, ensuring full compliance with Environmental Agency standards and local water authority regulations.
