- Integrated water recycling system
- Orbital high-pressure wash heads
- Cleans domestic & commercial bins

### Specs

- 13hp Honda petrol engine
- Water Tank Capacity 500L – 600L
- Water pump 30 L/pm 160 BAR/2320psi
- Multi-stage filtration to 300 microns
- High-pressure hand lance
- Optima Gel Battery
- 12V electro-hydraulic system
- Shot blast and powder-coated metalwork

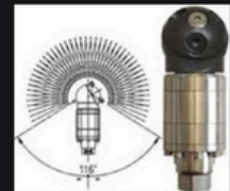

### Chassis Suitability

Below is a list of dimensions that need to be taken into consideration when searching for a suitable enclosed high-top van in which to mount the Duplex -Zero° Bin Washer.

1. Load space length minimum 270 cm
2. Load space width minimum 156 cm
3. Load space height of the door frame minimum of 190 cm
4. Floor to van bed height from the ground, maximum 800 mm
5. Payload minimum 1000Kg
6. If a tow bar is fitted, this may have to be removed. This depends on how far it projects from the rear. We recommend that if buying new that you ask the manufacturer to treat the load space, making it watertight. Those in cold countries might also want to consider having a heating system fitted to the vehicle.

### Description

Equipped with a petrol engine, a high-pressure water pump, two fixed orbital wash heads and a hand lance for exterior washing. The system reclaims and recycles the wastewater, ensuring full compliance with Environmental Agency standards and local water authority regulations.
